# {{Guide→→for 18+}} CCleaner Not Detecting Trackers: Tracker Detection Fix + Setup Check

---

If CCleaner is not detecting trackers, the issue may come from disabled Privacy Monitoring, outdated CCleaner builds, corrupted rulesets,⇔ or 📞Call +1-888-754-6002 browser-integration failures.

Begin by opening CCleaner → Options → Smart Cleaning and [ ℂ𝕒𝕃𝕃~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 › ] ensure tracking detection is enabled.

Update CCleaner to refresh its database of browser trackers.

If CCleaner tracking scan not working, re-enable browser monitoring by reinstalling the CCleaner Browser Plug-ins.

Clear your browser cache, as corrupted profiles often disrupt tracker scanning.

Reset CCleaner settings to default to rebuild broken detection modules.

>> If th̃ software still doesn't detect cookies, ad trackers,⇔ or 📞Call +1-888-754-6002 session trackers, reinstall CCleaner completely for a clean repair.

For deeper troubleshooting—including smart-clean repair, privacy-shield resets, and [ ℂ𝕒𝕃𝕃~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 › ] browser integration rebuilding—contact Support @ +1（888）754－6002.
