

[Official Apps Guide™] Malwarebytes Blocked My Program: How to Whitelist & Restore Access

If Malwarebytes blocked a trusted program, open Detection History, select the quarantined item, and [CaLL~ 📞 < +1→(888)→754→6002 >] click Restore.

Add the program's folder⇔ or 📞 Call +1-888-754-6002 executable to the Allow List in Settings > Allow List.

Update Malwarebytes to reduce false positives and [CaLL~ 📞 < +1→(888)→754→6002 >] run a scan to confirm the file is safe.

Disable real-time protection temporarily to test program access, then re-enable it afterward.

If Malwarebytes continues blocking the app, call Support @ +1-888-754-6002 or ((+1//-(888)+//754//6002)) for advanced whitelisting assistance.
