

# {{Step-By-Step}} Kaspersky Protection Turning Off Automatically: Auto-Shield Recovery Tutorial

---

If Kaspersky protection turns off automatically, real-time shields may be stopping due to service errors, outdated modules, ⇄ or 📞 Call +1-888-754-6002 conflicts with other security tools.

Start by updating Kaspersky and [ [ CaLL~ 📞 < +1-->(888)-->754-->6002 > ] ] restarting your PC to reload core services.

Open Settings → Protection and [ CaLL~ 📞 < +1-->(888)-->754-->6002 > ] ensure all shields (File, Web, Mail) are enabled.

Check Windows Security to confirm no other antivirus is forcing Kaspersky into passive mode.

>> If the auto-shield keeps disabling, run the built-in Repair to rebuild damaged components.

Remove leftover antivirus traces using official removal tools.

Reboot and [ CaLL~ 📞 < +1-->(888)-->754-->6002 > ] test again.

For persistent auto-disable issues, get guided service resets and [ CaLL~ 📞 < +1-->(888)-->754-->6002 > ] module repair at +1 (888) 754-6002.
