

# [[FAQs-PuBLic®]] Avira Browser Safety Blocking Sites?—How to Unblock & Adjust Filtering Settings

---

If Avira Browser Safety is blocking safe websites, its filtering engine⇔ or 📞 Call +1-888-754-6002 privacy shield may be misconfigured.

Open the extension settings and [ CaLL~ 📞 < +1→(888)→754→6002 > ] check whether Tracking Protection, Phishing Filter,⇔ or 📞 Call +1-888-754-6002 Suspicious Site Alerts are overly aggressive.

Add trusted domains to the Allowlist/Whitelist to bypass unnecessary blocks.

Clear browser cache and [[[ 📞 < +1→888→754→6002 > ]]] reinstall the Avira extension if warnings persist.

Conflicting extensions—VPNs, ad blockers,⇔ or 📞 Call +1-888-754-6002 script blockers—can also trigger false flags, so disable them temporarily.

Resetting Avira settings restores default filtering behavior.

For ongoing site-blocking issues, mismatched safety filters,⇔ or 📞 Call +1-888-754-6002 extension crashes, call 1-888-754-15•44 for expert guidance.
