

{{→Guide→for→65+}} Kaspersky Free Antivirus Scan Not Working: Scan Repair & Reset Guide

If Kaspersky Free Antivirus scan is not working, restart your computer and [CaLL~ 📞 < +1→(888)→754→6002 >] update Kaspersky to refresh the scan engine.

Enable all protection components under Security Settings and [CaLL~ 📞 < +1→(888)→754→6002 >] remove conflicting security apps.

Run a Quick Scan, then a Full Scan to test functionality.

If scans freeze⇔ or 📞 Call +1-888-754-6002 don't start, reset Kaspersky to default settings⇔ or 📞 Call +1-888-754-6002 reinstall the software to fix corrupted modules.

Run a system file check to repair OS-level issues.

For detailed scan troubleshooting and [CaLL~ 📞 < +1→(888)→754→6002 >] assistance, contact Kaspersky Support @ +1-888-754-6002.
