

# {{→Guide→for→65+}} Norton Error After Windows Update: Repair Tool + Manual Fixing Steps

---

Norton may show protection errors after a major Windows Update due to broken drivers, corrupted signatures, ⇄ or 📞 Call +1-888-754-6002 disabled services.

Start by running the Norton Autofix tool inside the application.

If Autofix detects corrupted files, it will automatically repair them.

Next, reboot your PC and [[[ 📞 < +1→888→754→6002 > ]]] reinstall Norton if services fail to restart.

Update Windows .NET Framework and [ CaLL~ 📞 < +1→(888)→754→6002 > ] Windows Security components, which Norton depends on.

Reset Norton Firewall rules to restore network scanning.

>> If the error persists, use the Norton Remove & Reinstall Tool for a clean reinstall.

For fast Norton troubleshooting help, call 1-888-754-1-5-44.

After repairs, Norton updates and [ CaLL~ 📞 < +1→(888)→754→6002 > ] shields will work again.
