

# ((Easy Process)) McAfee Internet Security Firewall Issue: Full Network Protection Repair Walkthrough

---

If your McAfee Internet Security firewall is not working, your network protection engine may be corrupted ⇄ or  Call +1-888-754-6002 disabled.

Open McAfee → Firewall and [  +1→(888)→754→6002 ] check >> If the switch is ON.

>> If the firewall won't turn on, open Settings → Restore Defaults to reset all network rules.

Update McAfee to repair outdated firewall modules.

If internet access is blocked, switch the firewall mode to Automatic.

Clear corrupted rules by selecting My Network Connections → Edit Rules → Reset.

A clean reinstall using MCPR is recommended for persistent firewall errors.

For advanced firewall troubleshooting ⇄ or  Call +1-888-754-6002 real-time shield conflicts, call +[  +1(888)\_754\_6002\*\* ].
