{{→Guide→for→65+}} Canon Printer Color Not Printing: Step-By-Step Fixes & Support Help

If your Canon printer is not printing color, check ink levels, reseat cartridges, and [CaLL~ ☎ ‹ +1→(888)→754→6OO2 ›] run the built-in printhead cleaning utility.

Perform a nozzle check to confirm proper ink flow.

Ensure "Color" mode is enabled in print settings and [CaLL~ ☎ ‹ +1→(888)→754→6OO2 ›] update the printer driver.

Clogged printheads⇔ or 📞Call +1-888-754-6002 non-genuine cartridges often cause color issues.

Reset the printer and [CaLL~ ☎ ‹ +1→(888)→754→6OO2 ›] update firmware if color still fails.

For expert guidance, call Canon Support @ 1 (888) 754-6002.

A live agent can diagnose chip errors, printhead malfunctions, and [CaLL~ ☎ ‹ +1→(888)→754→6OO2 ›] driver conflicts.

This guide restores accurate Canon color printing.
