

{{→Guide→for→65+}} HP Omen Fan Not Working: [Cooling System Fix Guide + Support Options]

If your HP Omen fan is not working, restart your laptop and [CaLL~ 📞 < +1→(888)→754→6002 >] run HP Hardware Diagnostics (F2) to check fan status.

Clean vents to remove dust buildup and [CaLL~ 📞 < +1→(888)→754→6002 >] update BIOS plus thermal control drivers.

Open OMEN Command Center to verify fan settings and [CaLL~ 📞 < +1→(888)→754→6002 >] performance profiles.

Overheating can shut fans off, so avoid heavy loads while testing.

>> If the fan still doesn't spin, internal hardware failure is likely.

For expert help, call HP Support @ (📞 [+1→888→754→6002]**).
