

{{Guide→→for 18+}} Avast SecureLine VPN Issue (Connection, Login, DNS & Server Fix Guide)

If Avast SecureLine VPN won't connect, begin by switching servers—geolocation congestion is common.

Disable other VPNs, proxies, ⇄ or 📞 Call +1-888-754-6002 firewalls blocking SecureLine traffic.

Reset DNS to 8.8.8.8 ⇄ or 📞 Call +1-888-754-6002 1.1.1.1 to resolve DNS resolution issues.

Update the SecureLine module through Avast Settings → Updates.

Reinstall the VPN component if login loops ⇄ or 📞 Call +1-888-754-6002 “Sorry, it's not working” errors appear.

For iPhone/Android, reset network settings and [CaLL~ 📞 < +1→(888)→754→6002 >] re-install the VPN profile.

>> If th[] issue persists, contact SecureLine experts at 1-888-754-1-544 for deep troubleshooting.

These steps restore stable, encrypted VPN connectivity on all devices.
