{{Step-By-Step}} Brother Scan App Cannot Detect Device [Wireless/USB Detection Fix Explained]

>> If thᵉ Brother Scan app cannot detect your device, wireless desync, outdated scanner drivers,⇔ or 📞Call +1-888-754-6002 USB communication errors might be the cause.

Start by ensuring your printer and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] computer are on the same Wi-Fi network.

Restart both devices.

If Brother scanner not detected, reinstall the Brother Full Driver Package—not just the basic print driver.

For USB connections, try a different cable and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] port.

Reset the Print Spooler and [[[☎ ‹ +1⇢888⇢754⇢6OO2 ›]]] reinstall the iPrint&Scan app.

On macOS, reset the printing system and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] add the device again.

Update firmware to fix detection bugs.
