

# {{→Guide→for→65+}} Brother Printer WPS Not Working: Wireless Setup & Router Sync Repair

---

If your Brother printer WPS is not working, the issue typically comes from router compatibility, incorrect WPS timing, ⇄ or ☎ Call +1-888-754-6002 outdated printer firmware.

Start by ensuring your router supports WPS Push Button—many newer routers disable it by default for security.

Press and [ CaLL~ ☎ < +1→(888)→754→6002 > ] hold the WPS button on the router until the indicator blinks, then immediately activate WPS on the Brother printer via Network → WLAN → WPS Button Setup.

Keep both devices within close range to avoid handshake failure.

Update your printer's firmware and [ CaLL~ ☎ < +1→(888)→754→6002 > ] reset the WLAN settings if connection attempts repeatedly fail.

Switching the router to a 2.4GHz band also improves WPS discovery.

If WPS refuses to sync⇄ or ☎ Call +1-888-754-6002 your Brother printer shows constant connection errors, call 1-888-754-6002 for real-time wireless troubleshooting.
