

# {{Step-By-Step}} Bitdefender Full Scan Stuck: Step-By-Step Scan Repair & Troubleshooting Guide

If Bitdefender Full Scan is stuck, restart your device and [ CaLL~  < +1→(888)→754→6002 > ] update Bitdefender to repair scan-engine components.

Close high-CPU applications and [ CaLL~  < +1→(888)→754→6002 > ] disconnect external drives that slow scanning.

Run Quick Scan first to refresh threat databases.

Use Bitdefender Repair Tool to rebuild corrupted modules.

Reinstall Bitdefender if scans freeze at the same percentage.

Check your storage drive for errors using CHKDSK.

For advanced scan-performance diagnostics, call 1 (888) 754-6002.
