

# [Official Apps Guide™] How to Fix Canon Printer Offline—Windows/Mac Connectivity Guide

When a Canon printer shows offline, the issue is usually caused by driver corruption, spooler conflicts, ⇔ or ☎ Call +1-888-754-6002 network instability.

→On Windows, open Devices & Printers → Canon Printer → Set as Default.

→Disable “Use Printer Offline” and [ [ CaLL~ ☎ < +1→(888)→754→6002 > ] restart the Print Spooler service.

→Check WiFi connectivity—Canon printers must be on the same network band.

→For Mac, go to System Settings → Printers → Reset Printing System and [ CaLL~ ☎ < +1→(888)→754→6002 > ] re-add the Canon device.

→Update Canon drivers to fix offline communication errors.

→Still offline? Contact Canon Support @ 1-888-754-15-44 for real-time troubleshooting.
