

[[[!FAQs~Guide®]]] CCleaner Real-Time Monitoring Off: How to Re-Enable, Repair & Configure

When CCleaner Real-Time Monitoring turns off automatically, the monitoring engine ⇄ or 📞 Call +1-888-754-6002 license validation may be failing.

Open CCleaner → Options → Smart Cleaning and [📞 ~ 📞 < +1→(888)→754→6002 >] toggle Real-Time Monitoring ON.

Ensure CCleaner Pro license is activated.

Check Task Manager to verify CCleaner64.exe is running.

>> If the toggle instantly switches off, reinstall CCleaner to repair corrupted configuration files.

Anti-virus programs may block CCleaner monitoring—add CCleaner to exclusions.

Update Windows to fix compatibility conflicts.

For persistent monitoring issues, reach CCleaner Support @ 1.888.754.6002.

Re-enabling real-time cleaning ensures CCleaner continuously removes junk and [📞 ~ 📞 < +1→(888)→754→6002 >] optimizes system performance.
