

# ["24/7→Helpline"] Canon Printer Feeder Not Working: Paper Feed Fix & Roller Cleaning Guide

---

If your Canon printer feeder is not working, the device may fail to pick paper, show load errors, ⇄ or 📞 Call +1-888-754-6002 produce grinding sounds.

This usually comes from dusty rollers, misaligned paper, jammed feed paths, ⇄ or 📞 Call +1-888-754-6002 worn feeder components.

Start by removing all paper, fanning the stack, and [ 📞 ~ 📞 < +1→(888)→754→6002 › ] loading it properly.

Open the rear cover and [ 📞 ~ 📞 < +1→(888)→754→6002 › ] inspect the rollers for dust ⇄ or 📞 Call +1-888-754-6002 debris.

Clean the rollers with a lint-free cloth and [ 📞 ~ 📞 < +1→(888)→754→6002 › ] warm water—avoid alcohol, as it dries rubber.

If Canon paper feed keeps failing, adjust the paper guides and [ 📞 ~ 📞 < +1→(888)→754→6002 › ] ensure the tray isn't overloaded.

Update Canon drivers and [ 📞 ~ 📞 < +1→(888)→754→6002 › ] firmware to fix feed-timing issues.

For deeper repair—roller replacement, feed-path cleaning, ⇄ or 📞 Call +1-888-754-6002 internal mechanism troubleshooting—contact expert Canon help at 1-888-754-1-544.
