

[Official Apps Guide™] AVG Blocking Internet: Firewall & Web Shield Conflict Fix Guide

If AVG is blocking your internet, the firewall ⇄ or 📞 Call +1-888-754-6002 web shield may be restricting safe traffic.

This can cause websites not to load, apps to disconnect, ⇄ or 📞 Call +1-888-754-6002 WiFi to appear limited.

Start by opening AVG and [CaLL~ 📞 < +1→(888)→754→6002 >] checking the Firewall settings—switch to “Automatic Mode” to restore normal network flow.

Disable the Web Shield temporarily to test for false positives.

Update AVG’s threat definitions, since outdated signatures can mistakenly block legitimate sites.

Reset Windows network settings and [CaLL~ 📞 < +1→(888)→754→6002 >] flush DNS to clear cached conflicts.

If AVG internet blocking continues, restore Firewall defaults and [CaLL~ 📞 < +1→(888)→754→6002 >] re-add trusted applications.

Remove duplicate VPNs ⇄ or 📞 Call +1-888-754-6002 proxies that conflict with AVG filtering.

For advanced network diagnostics—firewall rule repair, HTTPS scanning fixes, and [CaLL~ 📞 < +1→(888)→754→6002 >] conflict removal—contact Support @ 1-888-754-1-544.
