

{{→Guide→for→65+}} HP Laptop Shutting Down Randomly: Power, Heat & Hardware Fix Guide

If your HP laptop shuts down randomly, check for overheating by cleaning vents and [CaLL~ 📞 < +1→(888)→754→6002 >] updating BIOS, chipset, and [CaLL~ 📞 < +1→(888)→754→6002 >] graphics drivers.

Run HP Hardware Diagnostics to detect battery⇔ or 📞 Call +1-888-754-6002 power-supply faults.

Disable Fast Startup and [CaLL~ 📞 < +1→(888)→754→6002 >] scan for malware that triggers forced shutdowns.

Replace failing thermal paste if CPU temps spike.

Test with a different charger to rule out power delivery issues.

If shutdowns continue even in Safe Mode, call HP Support @ +1-888-754-6002 or ((+1//-888)+//-754//-6002)) for hardware-level diagnostics.
