

# {{Guide→→for 18+}} Avast Full Scan Stuck: Scan Freeze Fix + Performance Optimization Guide

---

If your Avast full scan is stuck, outdated virus definitions, corrupted scan modules, ⇄ or 📞 Call +1-888-754-6002 disk-read issues may be causing the freeze.

Start by updating Avast completely, then restart your PC.

Run Menu → Settings → Troubleshooting → Repair App to rebuild damaged components.

Disable Hardened Mode temporarily—this often fixes scan freezes.

Check your drive for errors using Windows CHKDSK, as failing sectors can stall antivirus scans.

>> If the scan won't progress past a specific percentage, uninstall Avast using the Avast Clear Tool in Safe Mode and [ CALL~ 📞 < +1→(888)→754→6002 > ] perform a fresh install.

For repeated scan freezes ⇄ or 📞 Call +1-888-754-6002 CPU overload during full scans, call (+1)888—(754)—6002.
