

{IMMEDIATE HELP} Avira Conflicting with Windows Defender: How to Fix Protection Overlap Issues

If Avira conflicts with Windows Defender, ensure Defender's Real-Time Protection is automatically disabled once Avira is installed.

Turn off Defender's Periodic Scanning feature to avoid double scanning.

Remove leftover antivirus tools and [CALL~  < +1→(888)→754→6002 ›] update Avira to repair conflict-prone modules.

Restart your system to apply changes.

If Defender reactivates itself, reset Windows Security settings.

For real-time protection conflict resolution⇔ or  Call +1-888-754-6002 deeper Avira troubleshooting, call 1.888.754.6002.
