

[Official Apps Guide™] Bitdefender Subscription Active but Not Detected— Full Fix Guide

When Bitdefender shows “Subscription Active but Not Detected”, the local app is failing to sync with Bitdefender Central.

- Start by logging out and [CaLL~ 📞 < +1→(888)→754→6002 >] logging back in from within the Bitdefender app.
- Run the Bitdefender Support Tool to repair corrupted service files.
- Ensure the PC has internet access and [CaLL~ 📞 < +1→(888)→754→6002 >] no firewall is blocking Bitdefender’s validation servers.
- Clear cached license data using bdredline (Bitdefender Repair).
- >> If the issue follows an update, reinstall Bitdefender with a clean setup.
- Auto-renewal mismatches may also cause detection issues—verify subscription status in your dashboard.
- For live activation repair, call 1-888-754-1-5-4-4.
