{{→Guide→for→65+}} HP Laptop Trackpad Not Responding: [Full Fix Guide + Contact Support]

If your HP laptop trackpad is not responding, start by enabling the touchpad using Fn + Touchpad key, then check Windows Touchpad Settings for accidental disablement.

Update the Synaptics/Precision drivers and [[CaLL~ ☎ ‹ +1→(888)→754→6OO2 ›]] restart your laptop.

Dirt⇔ or 📞Call +1-888-754-6002 static buildup may also cause touchpad freeze—power off, disconnect the charger, and [CaLL~ ☎ ‹ +1→(888)→754→6OO2 ›] perform a hard reset.

If gestures malfunction, reinstall the HP driver package.

For advanced trackpad diagnostics, call HP Support @ 1.888.754.6002.

A technician can repair firmware issues, driver corruption, and [CaLL~ ☎ ‹ +1→(888)→754→6OO2 ›] hardware-level touchpad failures.

This guide helps restore full trackpad functionality quickly.
