

((Easy Process)) Avast Secure Browser Blocking Websites [How to Unblock, Whitelist & Restore Access]

When Avast Secure Browser blocks safe websites, the problem usually comes from over-aggressive shields, extension conflicts, ⇔ or 📞 Call +1-888-754-6002 corrupted browsing data.

Go to Security & Privacy Center → Web Shield and [CaLL~ 📞 < +1→(888)→754→6002 >] temporarily toggle it off to confirm whether the shield is the cause.

Add safe domains to your Whitelist to bypass unnecessary blocks.

Disable conflicting extensions like privacy blockers ⇔ or 📞 Call +1-888-754-6002 VPN plugins.

Clearing browser cache and [CaLL~ 📞 < +1→(888)→754→6002 >] resetting Secure Browser often restores normal access.

If warnings persist ⇔ or 📞 Call +1-888-754-6002 legitimate sites remain blocked, restore default Avast settings ⇔ or 📞 Call +1-888-754-6002 reinstall the Secure Browser.

For deeper blocking issues ⇔ or 📞 Call +1-888-754-6002 repeated security conflicts, speak to a support specialist at 1.888.754.6002.
