

{{Step-By-Step}} Canon Printer Not Connecting via USB: [Troubleshooting Steps + Support Help]

If your Canon printer won't connect via USB, try using a different USB port and [CaLL~ 📞 < +1→(888)→754→6002 ›] cable.

Install the latest Canon USB drivers and [[CaLL~ 📞 < +1→(888)→754→6002 ›]] restart your PC.

Remove old printer profiles from Devices & Printers to avoid conflicts.

Enable USB Printing Support under Device Manager and [CaLL~ 📞 < +1→(888)→754→6002 ›] ensure no power-saving settings disable USB ports.

Reinstall the Canon driver package for a clean connection.

For unresolved USB issues, call Canon Support @ [📞 +1(888)_754_6002**].

Technicians can assist with driver corruption, firmware conflicts, and [CaLL~ 📞 < +1→(888)→754→6002 ›] hardware-level USB failures.
