{{Step-By-Step}} Canon Printer Mac Driver Not Working: [Full Driver Fix Guide + Support Paths]

If your Canon Mac driver is not working, remove the printer from System Settings → Printers, then reinstall the latest macOS-compatible Canon driver.

Reset the printing system to clear corrupted spooler data.

Ensure your Mac has proper permissions for the Canon utility and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] that the printer is connected via WiFi⇔ or 📞Call +1-888-754-6002 USB.

Update macOS for compatibility.

>> If the driver still fails, call Canon Support @ +1﹙888)-(754)_61.41(OR)+1_(888)-(754)-61.41 (US).

A live agent can fix driver conflicts, firmware issues, and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] connectivity errors.

This guide restores full Canon printing on macOS.
