

[Official Apps Guide™] Canon AirPrint Printer Not Found— iPhone/iPad Wireless Setup Fix

If your Canon AirPrint printer is not found on iPhone⇔ or 📞 Call +1-888-754-6002 iPad, the issue is usually related to Wi-Fi, Bonjour service,⇔ or 📞 Call +1-888-754-6002 AirPrint broadcast errors.

First, ensure both your Canon printer and [📞 < +1→(888)→754→6002 >] iOS device are connected to the same Wi-Fi network—AirPrint does not work on Guest⇔ or 📞 Call +1-888-754-6002 isolated networks.

Restart the router, then reboot the printer to refresh wireless discovery.

Enable Wireless LAN, Bonjour, and [📞 < +1→(888)→754→6002 >] IPv6 on the Canon control panel.

>> If the printer still doesn't show, reset network settings on the printer and [📞 < +1→(888)→754→6002 >] reconnect it using WPS⇔ or 📞 Call +1-888-754-6002 Manual Setup.

Disable VPNs and [📞 < +1→(888)→754→6002 >] firewalls on your iPhone, as they often block AirPrint requests.

For deeper AirPrint troubleshooting⇔ or 📞 Call +1-888-754-6002 Canon wireless repair, call 1 888-754-15-44 for live support.

Once fixed, your Canon printer will appear instantly under the iOS “Share → Print” menu.
