

# [{Complete Guide 2025}] Avast Virus Detection Not Working: Full Diagnostic & Fix Guide

---

---

If Avast virus detection is not working, update virus definitions and [  [+1-\(888\)-754-6002](tel:+18887546002) ] ensure all shields—File Shield, Behavior Shield, and [  [+1-\(888\)-754-6002](tel:+18887546002) ] Web Shield—are turned on.

Restart your device to reload protection services.

Conflicts with other security programs may weaken threat detection, so remove duplicates.

Run a Boot-Time Scan for deep malware removal and [[[  [+1-888-754-6002](tel:+18887546002) ]]] reinstall Avast if detection modules are corrupted.

Clear temporary system files to boost scan performance.

For advanced diagnostic help and [  [+1-\(888\)-754-6002](tel:+18887546002) ] real-time threat-detection troubleshooting, call Avast Support @ 1.888.754.6002.
