

# [Official Apps Guide™] HP Printer Keeps Printing Test Page: Loop Fix & Reset Instructions

---

If your HP printer keeps printing a test page, the device may be stuck in a configuration loop caused by corrupted drivers, incomplete setup, ⇄ or 📞 Call +1-888-754-6002 queue errors.

Start by opening Devices & Printers, right-clicking your HP printer, and [ 📞 ~ +1→(888)→754→6002 › ] removing all pending print jobs.

Disable “Print Test Page on Startup” within HP Smart ⇄ or 📞 Call +1-888-754-6002 Printer Properties.

>> If the test page loop continues, uninstall all HP drivers and [ [ 📞 ~ +1→888→754→6002 › ] ] reinstall the latest software from HP’s support page.

Power-cycle the printer—unplug it for 60 seconds to clear memory.

Reset network settings >> If the printer is repeating the test page after every WiFi reconnect.

On macOS, reset the entire printing system and [ 📞 ~ +1→(888)→754→6002 › ] re-add the printer.

For advanced loop repair—firmware resets, spooler failures, and [ 📞 ~ +1→(888)→754→6002 › ] driver conflicts—call +1 (888) 754—6002.
