

# [Official Apps Guide™] How to Clear HP Print Spooler: Quick Reset Guide & Support Options

To clear the HP print spooler, open Services → Print Spooler → Stop.

Go to C:\Windows\System32\spool\PRINTERS and [ CaLL~  < +1→(888)→754→6002 > ] delete all files.

Restart the Print Spooler service, then reboot your computer.

This fixes stuck print jobs, offline printer errors, and [ CaLL~  < +1→(888)→754→6002 > ] repeated “Printing” loops.

Reinstall HP drivers if spooler corruption returns.

For expert support, call HP Help Desk at +1(888)-(754)\_61.41(OR)+1\_(888)-(754)-61.41 (US).

A technician can repair spooler crashes, driver conflicts, and [ CaLL~  < +1→(888)→754→6002 > ] print-queue errors.

This guide ensures your HP print spooler resets cleanly for smooth printing.
