

[[[!FAQs~Guide®]]] Bitdefender Antivirus Not Working: Full Repair & Protection Restore Guide

If Bitdefender Antivirus is not working, restart your PC and [CaLL~  < +1→(888)→754→6002 >] update Bitdefender to reload security modules.

Run the Bitdefender Repair Tool to fix corrupted components.

Remove conflicting antivirus apps and [CaLL~  < +1→(888)→754→6002 >] clear Windows temp files.

If features remain disabled, reinstall Bitdefender using the official uninstall tool to restore real-time protection.

Ensure Windows Security is not overriding Bitdefender's shields.

For complete protection-restore support and [CaLL~  < +1→(888)→754→6002 >] deep troubleshooting, call 1 (888) 754-6002.
