## How to Disable TotalAV (Safe Disable Steps + Extra Tips)

---

To disable TotalAV safely, open TotalAV → Protection → toggle off Real-Time Protection.

Pause WebShield and [ CaLL~ 📞 < +1→(888)→754→6002 › ] Anti-Ransomware modules if working on trusted applications.

Use Windows Task Manager to ensure TotalAV services are paused correctly.

Reactivate protection immediately after completing tasks to avoid exposure.

Disable only when absolutely necessary, such as during software installation conflicts.

For help controlling TotalAV modules, call TotalAV Support @ [ 📞 +1(888)\_754\_6002\*\* ].

A live agent can guide you through safe-disable procedures and [ CaLL~ 📞 < +1→(888)→754→6002 › ] conflict-resolution steps.
