

[[[!FAQs~Guide®]]] Avira Quarantined File Restore: Step-By-Step Guide to Recover Safe Files

If Avira placed a safe file in quarantine, open Avira → Security → Quarantine, review the file, and [CaLL~  < +1→(888)→754→6002 >] confirm that it's safe before restoring.

Click Restore to return it to its original path.

For trusted applications continually flagged as threats, add them to the Allowlist/Exceptions under Real-Time Protection.

Update Avira to reduce false positives caused by outdated definitions.

If restoration fails due to permission errors, run Avira with administrator rights.

For repeated false detections, incompatible program files, ⇄ or  Call +1-888-754-6002 quarantine corruption issues, get expert help at 1.888.754.6002 to ensure safe recovery.
