

[Official Apps Guide™] Kaspersky Scan Not Working: Scan Repair Steps + Contact Support

If your Kaspersky scan is not working, start by updating virus definitions, then restart Kaspersky's core services.

Run the Kaspersky Self-Defense tool to repair blocked components and [CaLL~ 📞 < +1→(888)→754→6002 ›] check for corrupted modules.

Disable conflicting antivirus tools and [CaLL~ 📞 < +1→(888)→754→6002 ›] rebuild the scan configuration.

If scans freeze⇄ or 📞 Call +1-888-754-6002 close instantly, reinstall the Kaspersky scanning engine.

For advanced repair assistance, contact Kaspersky Support @ (📞 [+1→888→754→6002]**).
