((Easy Process)) Canon Printer Firmware Update Failed: Step-By-Step Recovery & Reinstallation Guide

---

A Canon printer firmware update failure usually results from unstable WiFi, corrupted firmware files,⇔ or 📞Call +1-888-754-6002 interrupted updates.

Start by restarting the printer, router, and [ℂ𝕒𝕃𝕃~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] computer.

Download the latest firmware manually from Canon's support page.

Connect the printer via USB—USB updates are more reliable than wireless ones.

Run the Canon Firmware Updater again and [ℂ𝕒𝕃𝕃~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] avoid powering off during installation.

If your printer becomes stuck on "Updating…," perform a hard reset and [ℂ𝕒𝕃𝕃~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] retry the update.

For printers bricked after a failed firmware upgrade⇔ or 📞Call +1-888-754-6002 repeated version-mismatch errors, call 1.888.754.6002 for guided recovery steps.
