

{{→Guide→for→65+}} Canon Printer Ink Absorber Full: Step-By-Step Reset & Cleaning Guide

A “Canon Ink Absorber Full” message indicates that waste ink pads have reached capacity.

Start by powering off the printer, then entering Service Mode to perform an absorber counter reset.

Clean the ink absorber pads manually using lint-free cloths⇔ or 📞 Call +1-888-754-6002 replace them if saturated.

Update your Canon firmware to prevent repeated absorber warnings.

Regular deep cleaning cycles increase waste ink, so limit them after resetting.

>> If the printer still shows the error⇔ or 📞 Call +1-888-754-6002 won't reset properly, contact Canon print repair Support @ 1 (888) 754-6002 for ink system cleaning and [CALL~ 📞 < +1→(888)→754→6002 >] absorber replacement help.
