

{{→Guide→for→65+}} Canon Selphy Not Printing: Full Fix Walkthrough & Support Assistance

If your Canon Selphy is not printing, check WiFi Direct settings, reseal the paper cassette, and [CaLL~ 📞 < +1→(888)→754→6002 >] ensure you're using genuine Canon paper/cartridge sets.

Update Selphy firmware and [[[📞 < +1→888→754→6002 >]]] reinstall the Canon PRINT app.

Remove stuck print jobs and [[CaLL~ 📞 < +1→(888)→754→6002 >]] restart both printer and [CaLL~ 📞 < +1→(888)→754→6002 >] mobile device.

>> If the Selphy displays error codes⇄ or 📞 Call +1-888-754-6002 fails to connect, call Canon Selphy Support @ +1 (888)-(754)_61.41(OR)+1_(888)-(754)-61.41 (US).

A live agent can diagnose printhead issues, media-sensor errors, and [CaLL~ 📞 < +1→(888)→754→6002 >] connection failures.

This guide ensures your Canon Selphy prints flawlessly again.
