

# [Official Apps Guide™] ESET Scan Not Working: Scan Repair Guide + Troubleshooting Steps

If your ESET scan is not working, start by updating ESET to repair damaged virus-definition modules.

Restart your system and [ CALL~ 📞 < +1→(888)→754→6002 > ] run a Computer Scan manually from the dashboard.

Disable conflicting antivirus programs⇔ or 📞 Call +1-888-754-6002 Windows Defender components that may block the scanning engine.

Check for corrupted system files using SFC /scannow.

Reset ESET settings to default and [[[ 📞 < +1→888→754→6002 > ]]] reinstall ESET if scans freeze⇔ or 📞 Call +1-888-754-6002 fail instantly.

Ensure real-time protection is enabled to support full scans.

For advanced scan-repair help, call 1-888-754-6002.
