

{{Step-By-Step}} ESET Slowing Down Computer: Performance Fix Guide & System Optimization Tips

If ESET is slowing down your computer, disable unnecessary modules such as Idle Scan⇔ or 📞 Call +1-888-754-6002 Device Control.

Update ESET to fix heavy CPU spikes, then run a full system scan to remove malware causing slowdowns.

Exclude large folders from scanning and [CaLL~ 📞 < +1→(888)→754→6002 >] schedule scans during off-hours.

Reset ESET to default settings⇔ or 📞 Call +1-888-754-6002 reinstall if performance issues persist.

For deeper system optimization⇔ or 📞 Call +1-888-754-6002 ESET performance-tuning help, call ((+1)888—(754)—6002).
