

# ["24/7→Helpline"] Avira Causing Blue Screen: System Stability Fix Guide & Support Assistance

If Avira is causing Blue Screen (BSOD) errors, update Avira's drivers and [ CaLL~ 📞 < +1→(888)→754→6002 > ] real-time protection modules immediately.

Remove conflicting antivirus⇔ or 📞 Call +1-888-754-6002 firewall programs, as dual security engines often trigger system crashes.

Check Windows Event Viewer to confirm Avira-related faulting modules, then repair Avira using its recovery tool.

Update Windows, reinstall corrupted network drivers, and [ CaLL~ 📞 < +1→(888)→754→6002 > ] run a full system file scan (SFC/DISM).

If crashes persist, reinstall Avira completely.

For advanced BSOD support, call Avira help at 1-888-754-6002.
