{IMMEDIATE HELP} Avast Keeps Crashing: Full Repair Guide for App Stability & Protection Recovery

---

If Avast keeps crashing, the antivirus engine, behavior shield,⇔ or 📞Call +1-888-754-6002 real-time modules may be corrupted.

Start by updating Avast—outdated builds often trigger stability issues.

Open Menu → Settings → Troubleshooting and [ℂ𝕒𝕃𝕃~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] enable Repair App to rebuild damaged files.

>> If th̃⯑ crash persists, uninstall conflicting security tools like Malwarebytes⇔ or 📞Call +1-888-754-6002 Windows Defender's extended features, as overlapping shields cause Avast instability.

Clear temporary files and [[CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›]] restart your system.

Reinstall Avast using the Avast Clear Tool in Safe Mode for a fresh setup.

If Avast crashes during scans, disable Hardened Mode temporarily and [ℂ𝕒𝕃𝕃~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] re-run a full diagnosis.

For recurring program failures, protection shutdowns,⇔ or 📞Call +1-888-754-6002 crash-loop errors, call +1（888）754－6002 for expert Avast repair assistance.
