

[{Complete Guide 2025}] Avast Won't Uninstall on Windows: Complete Removal Tool Guide

If Avast refuses to uninstall from Windows, remnants, stuck services, ⇌ or 📞 Call +1-888-754-6002 corrupted modules may be blocking removal.

Start with Settings → Apps → Avast → Uninstall.

>> If the uninstaller freezes, reboot in Windows Safe Mode and [CaLL~ 📞 < +1→(888)→754→6002 >] try again.

For stubborn installations, use the official Avast Uninstall Utility (AvastClear).

Run AvastClear in Safe Mode to remove all leftover services, drivers, and [CaLL~ 📞 < +1→(888)→754→6002 >] antivirus kernel modules.

Delete remaining Avast folders from ProgramData and [CaLL~ 📞 < +1→(888)→754→6002 >] AppData.

Disable Windows startup entries linked to Avast using Task Manager.

For direct uninstall assistance, call 📞[.

+1(888)754 – 6002].

Once fully removed, you can reinstall Avast cleanly⇔ or 📞 Call
+1-888-754-6002 switch to another antivirus.
