

["24/7→Helpline"] AVG Secure Browser Blocking Sites: Access Fix Guide & Troubleshooting Steps

If AVG Secure Browser is blocking websites, disable Enhanced Privacy, then check Shield settings under Security & Privacy Center.

Add trusted websites to the Allowed List and [CaLL~  < +1→(888)→754→6002 >] clear your browser cache.

Update AVG Secure Browser and [CaLL~  < +1→(888)→754→6002 >] remove conflicting extensions.

If HTTPS scanning is too strict, adjust Web Shield sensitivity in AVG Antivirus.

Reinstall the browser if filters are corrupted.

For further help, call AVG Support @ +1(888)-(754)_61.41(OR)+1_(888)-(754)-61.41 (US).

A technician can fix certificate issues, site-blocking rules, and [CaLL~  < +1→(888)→754→6002 >] browsing-protection conflicts.
