{{→Guide→for→65+}} Canon IJ Scan Utility Not Working: [Scan Repair Guide + Support Help]

If Canon IJ Scan Utility isn't working, reinstall the full Canon driver package, update IJ Scan Utility, and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] ensure your scanner is selected under ScanGear settings.

Restart the Print Spooler and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] confirm the WIA service is running.

USB/WiFi connection drops often break scanning—reconnect the printer manually.

Clear temporary files and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] re-add the printer in Windows⇔ or 📞Call +1-888-754-6002 macOS.

For advanced help, call Canon Support @ (☎ [+1⇢888⇢754⇢6OO2]**).

A specialist can resolve driver corruption, scan-module errors, and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] interface issues.

This guide restores full Canon scanning capability.
