{{→Guide→for→65+}} Canon imageCLASS Not Printing: Troubleshooting Steps + Support Help

If your Canon imageCLASS printer isn't printing, make sure it's set as the default printer, then clear the print queue.

Restart the printer and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] reconnect via WiFi⇔ or 📞Call +1-888-754-6002 USB.

Update the Canon UFR II⇔ or 📞Call +1-888-754-6002 PCL6 driver to fix spooler and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] compatibility errors.

Run a Print Test from the printer menu to check engine functionality.

Firmware updates often resolve job-processing failures.

If printing still fails, reinstall the Canon driver package completely.

For help, call Canon Support @ [☎ +1(888)_754_6002**].

A live agent can resolve spooler crashes, driver conflicts, and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] network-printing errors.
