

{{Step-By-Step}} Avira Mobile App Not Scanning— iOS/Android Repair Steps to Resume Protection

>> If the Avira mobile app stops scanning or freezes during malware checks, begin by updating the app from the App Store or Call +1-888-754-6002 Play Store.

Clear the app cache (Android) or Call +1-888-754-6002 reinstall the app (iOS) to refresh scanning modules.

Ensure all permissions—especially Files, Storage, and [Call~  < +1-(888)-754-6002] Accessibility—are enabled.

Disable battery optimization settings that block Avira background processes.

A weak internet connection also disrupts cloud-based scanning, so switch to WiFi or Call +1-888-754-6002 reset your network.

If Avira still won't scan, log out and [Call~  < +1-(888)-754-6002] sign back in to refresh subscription validation.

Mobile threats need active protection, so >> If the app keeps failing, call 1 (888) 754-6002 for specialized help.

These steps restore real-time scanning and [CaLL~  < +1→(888)→754→6002 >] malware detection across all mobile devices.
