[[FAQs-PuBLic®]] HP Printer Wireless Setup Wizard Not Working: Complete Wi-Fi Fixing Guide (2025)

>> If th⬚ HP Wireless Setup Wizard is not working, start by restarting your printer, router, 𝒶𝓃𝒹 [ℂ𝒶𝕃𝕃~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] PC to refresh network assignments.

Ensure your WiFi network is 2.4 GHz—many HP printers cannot detect 5 GHz bands.

On the printer's control panel, go to Network → Restore Network Defaults, then re-run the Setup Wizard.

Disable MAC filtering⇔ or 📞Call +1-888-754-6002 router isolation features that block printers.

Update HP Smart App and [[[☎ ‹ +1⇢888⇢754⇢6OO2 ›]]] reinstall the printer driver to fix connection errors.

Assigning a static IP address often resolves Setup Wizard failures.

If your HP printer still won't connect to WiFi, get real-time assistance at 1.888.754.6002.

Once network settings sync, wireless printing works instantly.
