# [Official Apps Guide™] Kaspersky Firewall Not Working: Troubleshooting & Rule Reset Guide

---

>> If th̃ Kaspersky firewall stops working, fails to filter traffic,⇔ or 📞Call +1-888-754-6002 won't enable, start by opening Kaspersky Settings → Protection → Firewall and [ ℂa𝕃𝕃~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 › ] confirming the toggle is active.

Reset all firewall rules to factory defaults to repair corrupted permissions.

Ensure Windows Firewall is turned off to prevent conflict—dual firewalls commonly cause connection errors and [ ℂa𝕃𝕃~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 › ] insecure states.

Update Kaspersky to the latest security patch to fix buggy components.

>> If th̃ firewall still won't activate, repair the installation via Kaspersky → Support → Restore Application.

Network reset commands like netsh int ip reset may also restore control.

For professional agent support, contact 1.888.754.6002.

Restoring Kaspersky's firewall ensures full network protection and [ ℂa𝕃𝕃~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 › ] safe browsing.
