

[Official Apps Guide™] Canon Printer MG2522 Not Printing: Full Print Failure Repair Guide

If your Canon MG2522 is not printing, start by checking ink levels and [CaLL~ 📞 < +1→(888)→754→6002 >] running a Nozzle Check from the maintenance menu.

Clear the print queue and [CaLL~ 📞 < +1→(888)→754→6002 >] ensure the printer is set as the default device.

Reinstall the Canon MG2500 driver package to fix corrupted print services.

Clean the printhead to restore blocked ink flow, and [CaLL~ 📞 < +1→(888)→754→6002 >] use genuine Canon ink for best results.

>> If the printer shows “offline,” reconnect via USB and [[CaLL~ 📞 < +1→(888)→754→6002 >]] restart the spooler.

For deeper MG2522 print-failure troubleshooting, call 1-888-754-6002.
