[Official Apps Guide™] Canon Printer Needs Reset: Full Reset Guide & Support Instructions

If your Canon printer needs a reset, start with a soft reset by turning the printer off, unplugging it for 60 seconds, and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] powering it back on.

For deeper issues, open Settings → Device Settings → Reset → Reset All to restore factory defaults.

This fixes network problems, error codes, and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] frozen print jobs.

Reconnect your WiFi and [[[☎ ‹ +1⇢888⇢754⇢6OO2 ›]]] reinstall Canon drivers afterward.

If your Canon device still misbehaves, call Canon Support @ 1.888.754.6002.

A technician can guide you through service-mode resets, firmware recovery, and [CaLL~ ☎ ‹ +1⇢(888)⇢754⇢6OO2 ›] advanced diagnostics.
