What is Adipex 37.5mg?

Adipex 37.5mg is a brand of phentermine, a central nervous system stimulant that affects the hypothalamus to help reduce appetite. It is intended for short-term use, typically a few weeks, to assist in weight loss for patients with obesity or weight-related medical conditions.

Uses of Adipex 37.5mg

- Short-term adjunct to weight loss in obese patients
- Support for diet and exercise programs
- Management of appetite control

Dosage and Administration

The usual dosage of Adipex 37.5mg is one tablet daily, taken early in the morning to avoid insomnia. Treatment duration is generally a few weeks to minimize tolerance and side effects. Always follow your healthcare provider's instructions and do not exceed the prescribed dose.

Common Side Effects

- Dry mouth
- Insomnia or sleep disturbances
- Increased heart rate or palpitations
- Elevated blood pressure
- Restlessness or nervousness

- Dizziness or headache

Seek immediate medical attention if you experience chest pain, shortness of breath, severe headache, or signs of allergic reaction.

Flash Transfer Gateway Services: What to Expect
